

# CUTS Centre for International Trade, Economics & Environment

*Pursuing economic equity and social justice within and across borders by persuading governments and empowering people*

In 1983, Consumer Unity & Trust Society (CUTS) was established as a consumer protection organisation ([www.cuts-international.org](http://www.cuts-international.org)). With its headquarters in Jaipur, India and five overseas centres: Geneva (Switzerland), Hanoi (Vietnam), Nairobi (Kenya), Lusaka (Zambia) and Accra (Ghana), the organisation has evolved as a policy action- and think-tank on cognate subjects of Trade, Regulations and Governance for pursuing its Vision: *Consumer sovereignty in the framework of social justice, economic equality and environmental necessity, within and across borders.*

In 1996, CUTS Centre for International Trade, Economics & Environment ([www.cuts-citee.org](http://www.cuts-citee.org)) was established as a programme centre of CUTS to focus its activities on understanding the issues and implications of an emerging international trade regime under the aegis of the World Trade Organisation and bilateral/regional free trade agreements.

## GOALS

- Enable and empower representatives of the civil society and governments, from developing countries in particular, to articulate and advocate on relevant and contemporary issues of trade and development at appropriate fora
- Create a questioning society through empowerment of civil society representatives to promote transparency and accountability in the system of trade governance
- Promote equity between and among the developed and developing countries through well-argued policy research and advocacy on emerging and relevant issues of trade and development

## OBJECTIVES

- Present an independent political economic viewpoint on trade and trade-related economic, social and environmental issues from the perspective of Southern countries
- Sensitise policymakers about trade and development issues confronted by the people at the grassroots
- Empower civil society and government representatives to understand issues of priority for better welfare of Southern countries
- Juxtapose counterfactuals in debates on trade and trade-related developmental issues on a scientific basis
- Strengthen the capacity of developing country representatives in international trade negotiations and implementation of trade agreements
- Raise awareness in developed countries on trade and trade-related developmental issues for a better understanding of concerns of Southern countries
- Assist representatives of inter-governmental/multilateral organisations to better understand trade and trade-related developmental issues from Southern perspectives

## A Highly Respected and Internationally Recognised Outfit

Finding the balance between needs and challenges has always been key to the success of CUTS. Thanks to continuous high quality research and effective networking and advocacy, CUTS has grown. The WTO, too, has benefited from CUTS' knowledge of the trade challenges and limited capacity of developing countries.

## ADVOCACY

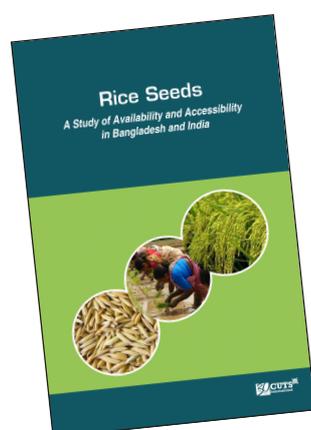

### Government Procurement in India A Tool for Good Governance & Global Integration

The objective is to evolve a model Government Procurement Policy of India taking into consideration its linkages with other major macroeconomic policies and to utilise the policy as a tool to promote socio-economic development objectives.

### Regional Integration in South Asia

The objective is to analyse reasons for economic non-cooperation among South Asian countries, assess the costs thereof in terms of loss of consumer and producer welfares, and derive recommendations for minimising such welfare losses. One of the major outcomes is increased awareness about consumer and producer welfare gains from import promotion within South Asia amongst key stakeholder groups.
