Mid-June marks a year since the successful conclusion of the World Trade Organisation's (WTO's) 12th Ministerial Conference (MC12). Despite significant gaps in their stated negotiating positions, WTO members were able to adopt a solution-oriented approach to ensure positive outcomes at MC12.

Both India and the United States played a pivotal role in steering the WTO membership to set aside some of their differences in the larger interests of reviving trade multilateralism.

While strategic trade is now the flavour of the day, the two countries also need to lead global conversations on making the future of trade multilateralism more resilient. Prime Minister Modi's upcoming visit to the United States offers a chance for the two sides to reaffirm their commitment to rules-based trade multilateralism as a global public good.

Join us as we discuss the ways in which India and the US can come together to promote trade multilateralism in this meaningful webinar.
